

Auto CAD Design project

Location **Alabama**
<https://www.genclassifieds.com/x-508232-z>

I have 2 projects that I need someone to assist me with designing in auto cad. We will need to determine the max. weight load and best type of material for the first project. The second project will be based off a small prototype that needs to be modified. Both projects will require a 3d digital design, parts list and manufacture production.
