Hello Animal Lovers,

I want you to meet Lucy, Cassie, Tux and Rocky: (and mamma and papa- they are still naming themselves!)

These sweet siblings are all about 8 weeks and and extremely cute and snugly! We rescued them from an alley near our house when they were about 5 weeks old, dirty and scared from living outside in a not-too-good neighborhood.

I am looking for homes that would consider adopting a PAIR of babies since kittens always do best with a partner in crime. Kittens, especially those that grow up with siblings and are socialized with other animals, tend to do much better with adjusting to new environments knowing they won't be on their own!

Lucy (calico female) and her buddy Rocky (small white stripe on nose) seem to have paired themselves up, just as Cassie (tortoiseshell female) and Tux (large white stripe on nose) have!

All of these babies are extremely sweet and loving and will be ready for adoption when they are 2.5lbs -3lbs. Almost there! We hope to place these two pairs of lucky babies in the best of homes as that is everything they deserve.

Also, I would like to mention that if you are looking to adopt and extremely sweet kitty, the Mom of these kittens is a kitten herself and 8 weeks old. She is a black and white girl, black and white turn color, the black on her coat is the same as the black on the dad also. She has the same good looking and sweet and fat body.

Upon adoption, the babies will be spay/neutered and up to date on shots and their adoption fee would be \$100/pair. This fee will cover surgery, vaccination (rabies and distemper), as well as microchip. They have also already been dewormed. The parents will also be fixed along with everything else!

They will come with all medical records and proof of expenses along with the rabies tag and microchip information.
