Hello;I am David and I am offering services for those of whom would like me to communitcate with a deceased loved one for you..I can truely speak to the dead.I am very real and take it very seriously.My wife and i visit alot of cemeteries.(The dead do watch over their bodies..It was their vessel.) I Don't go into some crazy trance and chant a bunch of jibber..I simply say hello..and they start talking away..And we have a normal conversation. A lot of times someone talks to me before I'm even out of the car..I ask their name and ask them to lead me to their headstone..or (mail box they refere it as.) usually they tell me where it is with no trouble.Ive helped many people with activity in their homes.unsigned deaths.and connected many with loved ones...So In short..thats what I do. prices vary call for details...If anyone is interested in contacting someone from the the beyond..give me a call. Thank You . Dave.
