We have been working on this for some time and are looking for help for one needy kitty (the black and white kitty0.

There has been a group of kitties near a relative's house. They do the best they can, but it has not been easy for them. At one point, someone helped by getting most of them neutered by All About Animals as well as taking some of them into their own homes. That worked for a bit, but there are still some that need help.

We took one of them - she was a feral, and is now a total house pet. I didn't think it could really be done, but we worked with her, along with a trusting kitten, and she is now a real charmer.

BUT WE ARE WORRIED ABOUT ONE OF THE KITTIES. She is a black and white kitty. She has white paws and a half-moustach on her face. She limps obviously due to an injury to her rear leg. You can see her walk on three legs, but we can't catch a good glimpse to see what actually happened to her back leg. She may be tucking it under herself. She had four kittens.We have found homes for three of them (three real charmers, too) and now working on the fourth.

Yesterday, Mamma cat peeked from under the garage door at my relative's house. You could see she wants help. I am pretty certain she would warm up like the other cat we have in our house.

CAN YOU HELP?? I need a real rescue league or someone associated with one so this kitty gets the caring she needs. You can see she is going to be a nice cat. I would also be willing to work with a high school student if they want to find a way to work out a service to help their school. There were working some hours and I can get for the cat a great suit and bow tie; but you would need to be willing to take care of the kitten with one of the rescues if you want to have the kitten. You would also need to be able to get someone to take her school to school, they would need with you to allow you to do this for your hours. This takes some time and finessing, but then they come around. I have written down what I did to get the other kitty to warm up and it is quite interesting as well as a bit of a psychological experiment, so not only animal-lovers but psychology students would like this.

IF YOU ARE INTERESTED IN HER KITTEN: This kitten is about 7 weeks old. It is a tuxedo meaning it is black with white paws and bib. The other three have homes and are good little house pets.

The picture of the calico cat in this post is OF THE CAT WE TOOK INTO OUR HOUSE WHO WAS FERAL AND NOW IS A HOUSE PET. We will post a pic of the Mom cat when we are able to get one. I hope you can help or know someone who can.

I will need documentation that you are a rescue, or vet references. I don't mind contact through email, but don't expect me to only communicate via email. Phone is nice.

Pics are: A pic of the calico cat who we now have in our house, who was a feral from the same group; a cat who looks like the Mom cat who needs help (dot on lip); pics of tuxedo kittens who look a little like the kitten who is with Mom cat.
