Guitarist seeking singer for a jazzy duet. The plan is to play a few standards as a foundation but the main goal is to develop original music. I have Several songs already written with melodies but these melodies are without assigned lyrics. I have some lyrics that could be used. I'm hoping that you have a relatively wide range vocally and can sing melodies that are a little more complex. I am a professional who works a 9a-6p weekday job and would want to practice at least once a week in the evening or on weekends. Our first goal would be to play a few songs smoothly together for an open.
