Previously used 1ct round center stone Diamond Engagement Ring. The center stone is a round 1.1 tcw. It is 18k white gold. The band has about 30 small round diamonds on the sides. I have had this ring for about 5 years now. I am unsure of the color or clarity of the diamond, but it is not cloudy. It does have a champagne tint to it and small visible markings. It has been re-sized by my jeweler to an 8 (you can re-size it again) and there were no known issues at the time. It is a pretty ring and does sparkle. The price is negotiable. Paid \$5500 originally from a Jewelry Broker. This is still way cheaper than if you were to buy it at the jewelry store or some other listings. Email me with questions. Thanks.
