Double Cola Cooler. \$300 CASH. I had it plugged in this week and it runs fine. The logo is stamped into the metal on it. From what I have been told this is the kind that you put water in and it cools the water to keep your drinks cold. It has a drain valve in the bottom that you can attach a garden hose to for draining it or sit a bucket under it to catch the water. It has a mesh basket on the inside of it so bottles or cans are not sitting right on the bottom of it. The piece on the front that catches the bottle caps lifts off to empty it. It is 45" wide x 26" deep(29" with the opener on the front) x 34" tall. The doors slide on top to open and the one will also lift up to open. Will not hold for anyone and buyer has to pick it up when they come pay for it, NO SHIPPING. The first \$300 CASH can pick it up in Moberly. Calls only, NO TEXT anytime, from 8 am to 9 pm at

but leave a message if no answer if you want to be called back. I will not respond to text messages at.
