Attention climate change deniers. The Pope is coming to the U.S. to straighten your asses out. It's time for you deniers to man up and face the reality of manmade climate change. If the Pope who has been brainwashed by religion can face reality, then so can you. Climate change is not a liberal issue. Manmade climate change is a scientific fact according to 98% of the world's highly educated scientists. The thing about science is that it's true whether you believe it or not. It's time for you deniers to stop supporting the GOP and big oil. They do not care about you. Only that you can be fooled by them so you keep voting.
