

Car Stereo Installation

New Hampshire Location

https://www.genclassifieds.com/x-510510-z

It seems I have bitten off more than I can chew with my latest project. I have attempted to install a Pioneer Avic 8000NEX to my E46 BMW and I can't seem to hook up the unit to the speed sensor input and the reverse rear signal input for the navigation. I also can't seem to get any sound to come out of the speakers when I play anything through this stereo. The unit is already 90% installed it's just these issues that I'm having trouble with. If anybody with experience installing these kinds of stereos could help me out that would be great. I will pay you.
