New Mosquito Control Company in the Fargo Moorhead Area

We're looking for yards to spray before getting our business fully operational to work out the start up kinks.

We're using a product derived from chrysanthemum plants, which is kid and pet friendly. Once the product dries, it's good for up to 8 weeks depending on the rainfall.

The product we're using is the same active ingredient as one of Cass County Vector Control's main adult mosquito control products - safe and effective.

Pricing based on yard size, starting at \$30 for these first few weeks. We will gladly spray neighborhoods and subdivisions as well as commercial areas like restaurant patios, softball and soccer complexes, fireworks display areas and.
