I normally wouldn't do this but I lost my mini SD card at the Dilworth Walmart or Moorhead Walgreens and can not find it. There is 1000+ photos and videos on the card that are very important to me and my family. I didn't realize it was gone until I was going to make a copy of a picture that is on the card yesterday. It has photos of my kids/b-days/holidays/school functions/my father's funeral and brother who has passed away and many more...it also has a clip of my father talking. Please if you have found anything like this please contact me. I can't remember exactly when I might have lost it but it may have been dating back 1-1 1/2 yrs ago. Last time I made copies of something on card was after my brother died. Please contact me if you feel you might have found it.
