Hi,

I'm a freelance data scientist & statistician that can help you analyze and make sense of your data.

I can help you with a more formal statistical analysis and/or write you some code to collect and analyze your data.

I'm proficient in R, C/C++, python, html, SAS, java, javascript and a bunch more programming languages. I have a PhD from Yale, worked on wall street and wrote a textbook on stats/actuarial science.

If you like, I can offer you a free consultation where you explain your problem and I'll let you know if I can help.

Looking forward to hearing from!
