

Discount Sun Screens...10 Thru May (tempe)

Location **Arizona**
<https://www.genclassifieds.com/x-511902-z>

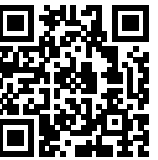

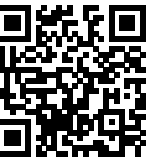

Give your home or business a great look while saving money and lowering your energy bill. Studies have shown exterior solar screen shading as THE most cost-effective and efficient way of controlling heat and glare entering any window. The exterior application of solar screens has proven to be far superior in enhancing window performance, and controlling the sun's damaging UV rays that enter your home. Solar screens can also reduce the overall "load" of an air conditioning system up to 60%...lowering interior temperatures 10 to 15 degrees, and SAVING YOU MONEY on utility bills immediately! Added savings are realized in longer lasting equipment, requiring less maintenance due to the decreased work load.

- Blocks up to 90% of the harmful UV rays from the sun
- Conserve energy and save up to 20% on utility bills during cooling months
- Can reduce household temperatures by 10 to 15 degrees
- Extremely tough and long-lasting outdoor fabric
- Flame resistant and fade resistant
- Improves visibility and reduces the glare through windows and doors
- Provides window protection and outside privacy
- Protects against fading and sun rot of furniture, draperies, rugs, and carpets
- Keeps pests and insects out while allowing a pleasant breeze
- Custom built to fit almost any size and shape windows including arches and irregular shapes
- Adds enhanced value and improves appearance of home

Solar screens can be easily removed for occasional cleaning and reinstallation for interior use during the first of the season.

The most affordable and professional looking and used by the PHIFER SunTex 80 Solar Screen is made of a heavy and tough brand synthetic fabric made of PVC coated polyester. Designed to reduce heat transfer through windows, this fabric also reduces the glare and harmful rays from the sun. While blocking the sun's rays, Solar Screens will reduce energy costs and provide protection for your indoor furnishings and is flame resistant and fade resistant. Excellent for daytime privacy without blocking the view. PHIFER SunTex 80 Solar Screen blocks up to 80% of the sun's rays, and PHIFER SunTex 90 Solar Screen blocks up to 90% of the sun's rays and comes in a variety of fabric colors.
