I have a 1984 Porsche 944 5 speed, this is one of the few 944s made without a sunroof, it's a really good car, I just put a new head with new valves on it, new head gasket and intake manifold gaskets, along with a new timing belt and balance belt. I put a new alternator in it and a good radiator in it, runs great, drives great, odometer still works, it's flat black (primer) that is flaking away in a few places but the body is good, interior is amazing, I installed two momo reclining bucket seats and one 4 point harness, but the seat belt is still there, I also installed a racing steering wheel, don't worry this car has never seen a race track, I take care of this thing, I love this car, I've had 3 but It's time for something new \$4000 or trade, just let me know what you got Email me
