Digital and Cassette Recordings (Denver)

Location **Colorado**
https://www.genclassifieds.com/x-512267-z

I am renting a space for playing and recording music in a warehouse space in Denver. If you are interested in having your music recorded I can mix everything to a cassette tape, or a digital stereo track on Ableton, or both. I am trying to acquire more microphones to mic individual amps, but at the moment for recording I use a Yeti Pro through a Tascam Mk-II and a tape deck. I also recently obtained a tascam portastudio 4 track, and basic video equipment using DV tape which can be sent through the computer for digital. If interested I can try and figure out how much it would cost. I am interested in recording every kind of genre, but I would like to see a soundcloud, bandcamp, or some link before we discuss.
