

## Help

Location **Alaska** https://www.genclassifieds.com/x-512590-z

A week ago we had two sightings of a long-haired orange cat with a huge gray bump on his back. It is either a tumor or just in terrible need of a grooming. We haven't seen him since but a neighbor said she has seen him for about six months. If you feed or know this cat, or see it, please email me immediately. If you call instead and I don't answer please email or text then. I have a cat rescue organization ready to help. .
