WE manufacture hurricane resistant custom storage sheds / buildings. A large shed selection or can manufacture one to your custom size and layout. You pick the color. . . All of our Vinyl siding or hardie board sheds (Buildings) meet building codes and are manufactured with an all 16 inches on center frame, wall studs, floor joist and trusses with a cross brace on every wall that is required in home code for its strength and integrity in structure. An all pressure treated floor and thermo-ply insulation on your walls and for your roof you'll get 1/2 inch plywood with 30 grade felt and shingles or upgrade to Standing seam Galvalume steel roof. . .Known for its superior resistance to wind damage. These sheds have been City and State certified and are The ONLY sheds sold to have a hurricane tolerance wind load of 180 MPH of Exposure class D of hurricane gust wind damage . . . specifically assigned for South Florida coastal areas and the only ones that meet the Florida keys strict wind load classifications of exposure D ( Exposure C won't do). These sheds can be installed legally right on the coast line... This is how well constructed these

sheds are. These are real buildings not your grandmas shed, so you can turn them into a pool house, home office and bar, convert into a car or motor cycle garage or just simply a storage, given you have the space. It's your yard, it's yours and it's your building without any pressure to sell and you will enjoy it. We are one of our customers to be the construction industry that build real sheds for better construction and quality, better than the rest of the shed and building market. That's why we are chosen more often by architects, government and the general public.. Open 7 days 9 to 5:00 pm... We own and need your privileged business. We also move sheds and deliver. Most have unobstructed access or delivery truck and shed. There is an extra charge if needed.. We custom manufacture any size up to 720 sqft.
