

# Boss RC (300 USD)

Location **Colorado**  
<https://www.genclassifieds.com/x-524611-z>

Hey everyone! If you're reading this, you probably know what this FINE piece of gear is all about. It's pretty simple, really: This is *\*widely\** regarded as simply the best and most versatile loop pedal out there. This is no surprise from Boss, as they're really the pioneer and industry leader in looping technology.

And so this particular unit is in excellent condition, works perfectly and any aesthetic imperfections can only be considered very minor. And it's 100% FUN! Become a one man band. Impress your friends or just yourself, or even gig with it. I never even got into the really advanced functions, but it definitely has some *\*serious\** versatility. Greatly improved my playing, and will for you too. And on top of being a loop station, it has all kinds of built-in effects. Legit Boss quality, built like a tank. Includes original power adapter. Can't seem to find the manual, but this is totally free to print out on the Boss website.

Check out your choice of demo videos:

Totally fair price for a like-new RC-300. Including necessary tax, you would otherwise spend about \$600 for a new one. And we'll have it hooked up, so you can test it out fully...no surprises. I'll even give you a quick lesson/demonstration, so you can get a jump on creating some killer jams.

So anyways, just give me a call/text and we'll get'er done! Thanks and see you soon! )
