It has a little over 76000 actual miles on the drive train engine starts and runs smoothly. I recently bought this beautiful rv and now our A/C in our home went out!! So the r/v has to go! This rv has brand new tires, all the way around no leaks!! The previous owners went through and did a complete tune up on the engine, new plugs, wires, cap and rotor, oil and filters. They only had it for a year and sold to me because they were moving out of state. The people they bought it from bought it new! I have all of the paperwork! Everything works heater, a.c., cruise control, power steering, power brakes, current emissions. The vehicle runs and drives great! I hate to let this one go but what you gonna!!
