My Buick runs and drives perfectly. Only 125k! I've had it now for over 4 years and has been exceptional for me. I've always kept up the maintenance and have records to prove it. It has A 2 month old battery, new serpentine belt, 2 year old spark plugs and wires, 2 year old brake pads and rotors, cooling system has been flushed in the last 3 years, AC is COLD and the heat is warm. Power seats, locks, heated driver and passenger seats, dual climate control, traction control, driver information center which displays a lot of info, keyless entry with remote start, compass. Interior is very clean and well kept with black leather and wood grain accents. I have an aftermarket Kenwood CD player installed and also have the factory unit which buyer can have. The wheels on the car are 3 months old along with the tires which are General GMaxs. 20" Liquid Metal Static wheels. You're getting brand new tires and wheels. Windows are tinted all the way around. Car has the excellent 3.8L V6. I average 20-21 mpg combined city/highway with plenty of power. Gets 27 on the highway.

A few cosmetic problems which you can see in the pics: On the hood there is a spot where the clear coat has came off. It's not spreading though. The rear drivers side bumper has a scuff and the chrome trim piece fell off. I have a new piece in the trunk, just haven't installed it. Other then that the paint is very clean and shiny. Asking 5500.
