

FIREWOOD 4 SALE

Location **Wyoming**
<https://www.genclassifieds.com/x-527261-z>

I see people advertising a pick-up load of firewood as a "Full Cord"

- Please check out my Photos

A full Cord of Wood is "OVER" the top of the Bed of a full size Pick-Up - A Cord of wood is measured at - (4 feet x 4 feet x 8 feet long)

- If the firewood is "STACKED" in a Full Size Pick-UP (8 foot) Bed with "No Toolboxes" filled to top of the bed - you are getting about 1/2 Cord of wood.

- If it is randomly tossed in the Pick-Up Bed - again full size (8 foot and no toolboxes) - you are getting about 1/4 to 1/3 of a cord.

Many of us are actually "Offering or Delivering" - correctly measured amounts of wood - please deal with them - at least you are getting the amount of wood you are paying for.

From our experience:

- Full Size Pick-Up - (8 foot pick-up bed and no toolboxes) - filled with firewood "STACKED" in the bed to the top and slightly domed in the center is - 1/2 cord

- Small Pick-UP - like Ford Ranger, Toyota Tacoma, Dodge Dakota - etc. - (7 foot pick-up bed and no toolboxes) - filled with firewood "STACKED" in the bed to the top and slightly domed in the center is - 1/4 cord

- Small SUV's - like Subaru Forester, Jeep Cherokee, Chevy Blazer, Ford Explorer, etc. - with firewood stacked in the back to the top in the load area is - 1/4 cord

Check out your computer for size of a cord you need - We do have more photos available
