

Wenzelite Nimbo Pediatric Posterior Walker, for medical use (200 USD)

I have a Wenzelite Nimbo Pediatric Posterior Walker with hip stabilizer. I paid over \$300 for the whole deal. My daughter used it from 15 months old to 3 years old. It's in perfect condition other then one of the latches on the back lock is broke but can be fixed. I'm trying to buy the next size up the green one or a pediatric wheelchair for her. This is a medical device, not a regular.
