

Rustic Dining Room Tables (Eastern Montana)

Location **Montana**
<https://www.genclassifieds.com/x-529868-z>

We aren't two guys in a garage who build furniture on the weekends, we're a small-scale furniture manufacturer in Montana known for making gorgeous, heavy, and well-built dining sets. As you'll see from our photos, our rustic dining tables are made by hand with beetle-killed douglas fir from the Rockies, not Lowe's or Home Depot dimensional lumber. If you're looking to have a custom design product made out of home building materials we aren't the company for you. Our pricing ranges from \$800 - \$2200.

We offer quite a few different designs and proudly ship our products throughout the U.S.

Check out our Facebook page with over 8,000 likes and photographs, testimonials and positive reviews from customers all over the country. We've been in business for over three years and worked hard to earn our strong reputation.

Please don't hesitate to give us a call with any other questions you might have, we'd love to hear from you!
