2. I have strong attention to detail and safety is my #1 priority! I torque all lug nuts to manufacture spec and make sure I grease and clean all caliper pins. I use brake cleaner to clean off the rotor. I clean the bracket with metal brush and grease the brackets. I grease the back of pads and the sides where they slide into the bracket. Few extra steps goes a long way

3. I warranty all my work 3mo/3k miles and give you an actual professional invoice for your records, I am a legit business registered with the State of NC.

4. No up-selling and trying to pressure you into unneeded repairs. If I see something that is unsafe that needs your attention, I will INFORM you but will not pressure you.

PRICES: ***Please contact me for prices other than brake work***

Labor for just brake pads: \$30 (some cars extra, let me know the year make and model)
Labor for pads and rotors: \$45 (Some European cars have brake wear sensors (BMW, Mercedes, VW), I can replace those as well for \$5 additional)
Labor for brake drum shoes: \$50

PARTS

I can install parts you provide or I can supply parts. I get my parts from Advance Auto Parts, I CHARGE WHAT THEY WOULD CHARGE IF YOU BOUGHT IT DIRECTLY FROM THEM. I charge the price you see on advanceautoparts.com.

The discount I get from them is enough to cover my fee for getting the parts and possibly having to redo the job because of faulty parts. This is what I would call a win-win situation.

3 month 3000 mile warranty on parts and labor when I supply the parts. I cannot warranty parts that I do not supply.

Jay's service was beyond excellent! He came to my home to service my car, arrived on time, completed the job in a quick and timely manner and still gave good quality genuine service. Not only did he do great job, he also took the time out to suggest upcoming repairs that needed to be done in the future.
