BEAUTIFUL - Black & White - 7yr FEMALE - needs home (Monroe)

*** FERRIS - was sprung, by me, from Deaths Row on the day her number was up! She arrived real thin, w/missing patches of fur, Upper Respiratory Infection and was so weak she could barely lift her head up. On top of this I later found out she was pregnant too! Her first pregnancy at 6 years old!. She had two, kittens and she was the most loving, gentle, attending Mom I ever saw!

Ferris is a special needs kitty as she has FIV which basically means she has low immune system. However, if she is kept inside and taken care of by a loving owner she will live many more years to come! AS you can see, with all that she has been through, she is strong! Since she has FIV it is best for her to be the only cat in your household or with another that has FIV.

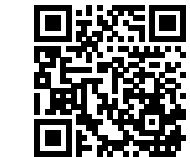

Ferris is BEAUTIFUL inside and out! She's a BIG GIRL with a very sweet temperament (gentle) and loves to hang out. She loves her food too and she will often thank you by giving you sweet "kitty kisses".

FERRIS - is spayed but it would be best for you to get her Vet checked.

If you think you may have room in your heart and in your home and are ready to make a lifetime commitment to this sweet, playful, companion,.....please call her foster Mom @

Screening, Vet references and adoption fee will apply.
