We have an 8 month old yellow lab/ golden retriever that we need to rehome. he's a good dog but is food/treat aggressive and we have 3 kids running around one being a crawling baby so we can't have the worry anymore. we've tried working with him in different ways but nothing seems to be working. he is potty trained and kennel trained. he knows basic commands and fetch. he's also up to date on shots and neutered. we need him a new home asap. thank you in advance. text or email preferred
