I need a hair cut and was wondering if there were any hair stylists online that could take an appointment. There's no hidden agenda. I really just need a haircut. But, I also have a thing for sexy hair stylists and actually get turned on when I'm sitting in the chair and feel her fingers working through my hair. If you're open to it, maybe we could flirt during the appointment and you could discretely lean against me as you work. Nothing else needs to happen and I promise to keep it professional for your work environment. A generous tip is available. Anyone?

Me: 40yo, professional, personable, cute, nice thick brown.
