

## Dentist request (Fargo)

Location **North Dakota**  
<https://www.genclassifieds.com/x-561162-z>

I received two dental opinions now, for my top teeth - I have been told though I still have my own teeth in my upper mouth, they must be removed to put in a full upper denture. However, I don't agree (potential problems with full uppers: gagging, choking, not able to speak, not able to eat, doesn't sound like something anyone would really want).

I was told that I would have to find a dentist willing to repair my upper teeth, even though they may not last long - sort of an ethical dilemma for dentists, though gosh, all sorts of plastic surgery and other surgery things are okay nowadays, so why not this?

Please, anyone know of a dentist willing to fix my teeth (and a nice dentist, not someone mean or medically dangerous), even as they are, in the Fargo/Moorhead area, or anywhere else within ND or MN? I'm 53.

Thank you for your help.
