Help your child become more secure with the basics of reading, writing, and/or arithmetic by providing a tutor BEFORE a bigger problem arises or gets worse.

You know your child best. Would a tutor help your child be more successful or gain confidence?

Professional educator/tutor/author available for one-on-one tutoring and/or homework help in my home office. Summer hours available for catching up - or tutoring can begin with the school year! Book now!

If your child's performance last year had been less than what you believe is his or her ability - or if your child seems to have missed something along the way and you want to catch up, I can help. If you want to help your child have a more successful school year, get in touch with me.

I have years of experience working with children with learning disabilities - ADD, ADHD, Dyslexia, but I can work with most children who want to improve. The key is the child being part of the process. (I am not trained to work with children who are autistic or have more severe issues. Sorry.)

This type of specialized tutoring works best with grades 2 - 8.

All tutoring done in MY home office in NE Mesa.
