

xs 650 Carburetors (100 USD)

Location **Arkansas**
<https://www.genclassifieds.com/x-562813-z>

This is a complete pair of REBIULT carbs for a Yamaha xs 650. Everything you need is included here...plug and play. Carbs, linkage, K&N type pods and optional billet aluminum intake spacers for more torque. I went through these with a complete cleaning and installed compete rebuild kits including all seals, gaskets, springs, jets and float needle valves. Then of course went a whole different direction with my bobber project's intake and carburetion...then sold the bike. Give me a shout if.
