Learning the guitar can be extremely frustrating, but it DOES NOT have to be. Luckily, with my innovative teaching techniques, you WILL learn how to play the guitar much faster and efficiently than the standard (might I add boring) teaching approaches used by the vast majority of guitar teachers. You will be engaged and have fun during every lesson (Really - my students can't wait for their next lesson!).

- *Are you ready to finally learn your favorite songs?
 - *Are you struggling to get the hang of how to play the guitar?
 - *Are you completely lost? (this is normal in the beginning)
-

*Are you relying on the internet to teach you how to play guitar?

I am here to offer you highly motivational guitar lessons which will keep your fire burning, keep you intrigued and keep you focused on YOUR goals. I am confident I can help you cut your learning time in half or more.

E-mail your name and phone number today for your FREE Introductory Guitar Lesson... Don't hesitate, you really CAN learn the guitar!

I will call you back once I receive your information. Or you can fill out my form on my website!

I have been teaching children and adults to swim for 30 years.

I have taught hundreds of non-swimmers to swim and feel totally comfortable and safe in the water for the first time in their lives.

I have taught hundreds of small children to swim, but I feel my true gift is to teach adults who have been afraid of the water their entire lives.

Although many of my students are in their 20's and 30's, I taught a 70 year "young" couple to swim and they are enjoying their pool together for the first time in 30 years. I taught a 69 year "young" lady who has never been able to swim and was terribly afraid of the water. In her first lesson she learned to swim 2 different strokes and to float on her front and back. They will be happy to tell you about their experiences.

I have taught and trained many adults to swim in order to pass work related swimming tests to enhance and further their careers.

Every student I have taught is swimming in the first lesson, sometimes learning more than one swimming stroke in the first lesson.

I use special teaching techniques that have been successful for 30 years to assist students to get past their fears and conquer the water for the first time in their lives.

Teaching you to survive in the water and eliminate your fear is the primary objective of this highly effective course.

You can begin with 1 lesson to see if you like my teaching techniques.

You can organize a small group of 3-5 people for lessons or learn to swim privately. Students tend to learn even faster in a group.

Couples are welcome and it's a great way to spend time together, learning to swim and practice together.

Many references are available upon request and a price list is available by email.

Hi Students,

As an experienced Chemistry major tutor, I can help you with Chemistry, Organic Chemistry, Biochemistry, Thermodynamics, Math, SAT MATH/Chemistry, ACT MATH/SCIENCE.

So far, I taught ~65 students who were in high schools, colleges, and university. I had more than 450 sessions with ~650 hours of teaching, worked as a teaching and research assistant at the chemistry department for 9 years, and held scientist positions for research into nucleic acids, proteins, and cells. As a seasoned Chemist, I published 9 research papers, and developed many research protocols. From my fellow students, I received 4.8 stars out of 5 stars rating, and also get 5 outstanding students reviews for my teachings.

I taught and I am versed in Algebra (e.g., real/integer/root/fraction/rational numbers, exponents, algebraic expression, equations, functions, graphing, circles, ellipses, parabolas, polynomials, series, logarithm, permutation, combination, matrices, complex numbers, polar coordinate, and trigonometry), Calculus (e.g., graphings, functions and limits, inverse functions, derivative, antiderivative, differentiation, integration, vector calculus, Green's theorem, multivariate calculus, and differential equations), General Chemistry (e.g., measurements, energy, atoms and elements, compounds, chemical bonding, chemical reactions, equilibrium, kinetics and mechanism, thermodynamics, gases, solutions, acids, bases, buffer, nuclear chemistry, oxidation-reduction, electrochemistry, and molecular orbital theory), Chemical Thermodynamics, Organic Chemistry, Biological Chemistry (e.g., Biochemistry and Neuroscience), SAT Math/Chemistry, and ACT Math/Science.

My broad teaching experiences and rich scientific research background will be beneficial to you, especially in Chemistry and Math. Adding to note, I will provide good practical working examples to each question for better understanding. I am available throughout the weekdays and weekends as well. As always, I will do the best of best to satisfy your needs in Chemistry, Organic Chemistry, Biochemistry, Thermodynamics, Math, SAT Math&Chemistry, and ACT Math&Science. r email me if I can assist you. Thank you. Ug
