I have had this camera for about a year and have used it twice for video interviews. I have no use for the camera anymore as I do t take stills and have access to other video cameras.

What you get is: Sony A57 body, Sony kit lens 18-55, 4 extra batteries plus the original Sony battery, dual battery charger, Sony 8GB card, USB cable, Sony software, Sony camera lanyard, and a clear UV filter that protects the lens. Everything is packed snug and clean in the original box. I can include a decent camera bag, lcd screen protector, and tripod for a small amount more.

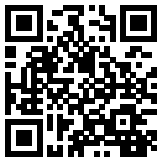

Thanks for looking!
