Are you tired of getting charged outrageous prices for subpar tutoring from Tutor Recruiting Companies? These companies recruit families to pay for tutoring that they just contract out. They just connect you to a random tutor and take a hefty commission for their brief involvement. This will have you paying over \$40/hour for a tutor while the tutor barely receives half of that. My goal is to build up my own student base so I can charge a more fair rate. So lets start with a little introduction.

Hi, my name is Brad Onder. I am an experienced Math Tutor of 7 years. I have tutored at the ACE Center for St. Charles Community College and for professional companies. I have tutored all types of students ranging from elementary school all the way thru college. I tutor all math including elementary math, Pre-Algebra, Alegebra 1&2/College Algebra, Trigonometry, Geometry, AP Calculus/Calculus & Analytic Geometry 1 and I even will tutor Physics as well. In college, I majored in Mathematics and Computer Science. I took Calculus-based Physics 1 & 2, Calculus and Analytic Geometry 1, 2, & 3 and Linear Algebra...I received an A in every course and I can show you my College transcript to prove it. I can even give you the number to my boss at the ACE Center in case you would like to know how good I am from her, but the best way I know to showcase my talents is to give it a trial run...For new customers, I will be offering a 30 minute trial run to start the first session. If by the end of the first 30 minutes, you feel that it will not work out, we will part ways at no charge. However, since I have never had a family that didn't absolutely love me as a tutor, I doubt it will come to that, but feel free to exercise that right if you feel the need, I will not be offended. The thing that makes me such a great tutor is that I can remember how it was to learn this material. I remember the thought process I had to go through to gain the understanding and I am very proficient at delivering that understanding in a multitude of ways. Since every student learns a little differently, I know that having many different approaches to the same problem is key in delivering that understanding. To do well in math, it is important to understand the concepts because once you understand the concepts, it doesn't feel like you have to remember anything. Sometimes the thing keeping you from understanding something that seems complicated is a misunderstanding of something simple. I am an expert at finding that simple concept and correcting the understanding of it. However, if you are in a tight window and don't have time for understanding, I can teach you the tricks and shortcuts to survive the test with a good grade as well, as long as you understand that it is a quick fix and is not a recommended approach if you are trying to become independent in the future. My goal for all my students is to not only get them an A in the class, but to make them able to get an A on their own, without the future need of a math tutor. I am not your typical math geek as I am a very likable person as well. People naturally gravitate towards me so this will not be just a boring math session. Even if you absolutely hate

math, I am very confident you will enjoy the session as most of my students look forward to them. I am very good at relating to my students and making the experience something that is enjoyable. I think it is important to make the learning process fun when the subject is engaging and interesting. I like to work with all types of people, it is a very enjoyable job to be a tutor when the student is interested in the subject. I will take this responsibility and I will be hard on you but not in a bad way. I have infinite patience to help you go to ask a question, in fact, I encourage it. I am not the only student tutor, I am the one that never got stuck. I have a sound understanding of all subjects, and I can help you with all subjects, even if you don't understand it, it helps to quickly identify what you are struggling with and help.

Now for the part that isn't so much fun pay next. I charge on two different scales, depending on where I go to your home (or if we meet somewhere), or you come to me. In both cases, I charge a flat rate of \$20/hour but if it requires that I travel, then it is \$30 for the first hour and \$20/hour after that. However, if you are really close by, it may drop that down to \$25 for the first hour, but if you are really far away, I may have to charge a little more for the first hour in order to cover gas and drive time. I live in Saint Charles, MO right off of Highway 70 at the Cave Springs/Harry S Truman exit. If you have any further questions, feel free to give me a call at and I will be happy to answer any questions you may have before we set an
