

2006 ford f350 power stroke 4x4 (17000 USD)

Location **Maine**
<https://www.genclassifieds.com/x-564269-z>

This truck has 125k miles, manual locking hubs, manual 4x4 (lever on floor not buttons or switches), automatic with tow/haul mode, the optional gauge cluster, factory built in brake controller, hitch with seven and four prong connector, ford step tubes, power windows and locks, a/c, am/FM CD and cassette head unit and husky floor liners in front. Also I just put four new Moog balljoints in for the new sticker (I still have the receipt.) The abs light comes in and goes out as it pleases could be dirty sensor or bad wheel bearing but brakes have always worked fine and I've never heard anything strange. Tool boxes will NOT be going with it (I have the trifacta tonneau cover from when I bought it). Asking 17,000. Text or email me. 2nine9
