It is a little ruff on the inside (but) outside is in pretty good shape. I had it out on the lake several different time for up to 6 hrs with out any problems last year. This year i took it out and it seems as if the water pump is not working. it started to get hot so i loaded it back up and dont have the time or money to mess with it. ladder rack it broke off and it need some interior work. It is mostly all gone. The motor and drive line run and work great other then the over heating problem that just came up this year. Has a 470 inboard motor. Has like new tire on it and two spares.

SO IF YOU ARE LOOKING FOR A CHEAP FISHING BOAT THIS IS IT
