Hello, Cleveland!!!

I'm J. and I've had an idea for an insane (yet awesome) project that I would love to get off of the ground.

This would be an amazing and unique project that would definitely make heads turn if we were able to pull it off right.

What I'm wanting to do is simple: Cover the iconic Prince - Purple Rain soundtrack from start to finish. The twist is that it needs to be heavy as balls, hence the project name "Purple Reign In Blood."

I have a great spot to play at in Mentor, and we would need the following players:

- \* Vox
- \* Keys
- \* Guitar one might suffice?
- \* Bass

Again, I'm 100% serious about this. Not only would it be a riot, it would also be musically challenging.
