Why pay high cut out the middle man I have 10 years exp. Trouble shooting breakers that's tripping replacing switches outlets light fixtures. Do you need lights added is a dark room or a outlet added under your end tables for a lamp need a outlet for your new wall mount TV is going i can also mount your flat screen would you like your surround sound speakers in the ceiling cables and phone jacks. Need a panel change out breakers replaced? Do you have an old Federal Pacific panel in your house did you know that the breakers has a defect that doesn't allow the breaker to trip when there's a problem which could start a fire.

Look forward to working with you soon . Send a email and i will be right over to get started I do nothing but quality work . Everything will be up to code and NEC standards. I take pride in my work I treat every job as if I was doing it in my own home look forward to hearing from you
