Breville Juice Fountain Crush slow juicer. Purchased last year for \$300. Minimal use (has been in storage), asking \$150. Really good juicer, but we are unable to use for dietary reasons. This is a slow juicer, not a centrifugal juicer. It presses juice out of fruits and veggies, retaining more nutrients. All parts work. Small tear on flap of inner filter basket, but does not affect performance. We learned it was from removing the filter to clean each time, which is unnecessary. Comes with instruction.
