Location Utah https://www.genclassifieds.com/x-565621-z

Brand new in original box. I have two pairs of these, so four total speakers. They retail for \$99 a pair. Asking \$150 for both pairs. Call or text if interested. Click "more ads by seller" to see my other listings.

## Description:

Polypropylene woofer Polycarbonate tweeter 100 watt power handling Rugged, weather-resistant enclosure

RK5G 5-1/4" 2-Way Rock Landscape Speakers

The RK5G Rock Landscape Speakers accurately reproduce high fidelity music in a variety of applications, including outdoor home theater. Not only are these loudspeakers weather resistant for outdoor use, they also feature rugged cabinets to ensure great sound for years to come in any environment.

Weather-resistant sealed cabinets and acoustically transparent grilles house a carbon-filled polypropylene woofer and a 5/8" polycarbonate tweeter for accurate, satisfying sound. The granite natural rock finish matches your patio or garden, and a drip vent behind the speaker grille allows proper water

Like all speakers, the RK5G Rock Landscape speakers sound best when placed in the line of sight to the listener with no obstructions.

## Easy Installation

If your application requires the speaker cable to be buried first verify the location of utilities. Be careful to avoid buried cables, gas lines, and sprinklers. Verify the operation of your RK5G speakers before backfilling.

The length of the longest speaker cable you need should determine the wire gauge required. Measure the longest run and consult the following chart before purchasing cable:

Distance Wire Gauge Up to 60 ft (18 m) 16 Up to 100 ft (30 m) 14 Up to 160 ft (50 m) 12

Run speaker cables inside walls and outdoors in accordance with local building codes. If you are unsure of codes or utilities locations, consult a professional contractor before.
