

# Looking to add a second camera operator to the business. (Fort Worth)

Location **Texas**  
<https://www.genclassifieds.com/x-565866-z>

It's been a great year thus far, and I am looking to train/hire a contractor camera operator for part time gigs.

This is a paid part time role in an incredible industry with opportunities to be creative and successful. Most of the opportunities last 1 - 2 hours with some other gigs lasting an 8 hour work shift.

You will be taught how to operate a gimbal mounted camera, and learn the business of the creative industry recording amazing visuals. The time frame for most gigs are from the hours of 9am - 2pm. This leaves a window for you to work your other job. You will have notification of the schedule.

I am looking for an entry level candidate. If you have experience, that is fine, but this is an entry level position. You will be a contractor for this business, and you will need to train before you operate in a paid assignment. Training is very simple, and as long as you have great hand and eye coordination, you will be able to pick this up in a few hours.

As a candidate, you will need to have the following qualifications.

- Reliable transportation.
- Punctuality.
- References.
- Great and creative attitude.
- The ability to follow directions and flourish from what you learn.

Candidates over 18 years of age that live in or around the Fort Worth area

(Male/Female/Transgender students are welcome.)

Interviews will be as early as next week
