Very SERIOUS Rock band currently in development and in with a multi platinum producer seeking a lead guitarist, Rhythm guitarist and drummer, preferably with long hair, The band has been recording at Legendary Rock Producer Howard Benson's studio with multi platinum Mike Plotnikoff. The band is based in LA.

Currently this is just a singer and bassist, previous to this project, both have been in world-wide touring bands, both on labels touring with Warped, Mayhem, and multiple club, stadium, and arena runs. Both in our late 20's, singer was formally a drummer, and the bassist also plays guitar so the 2 have been the ones writing and recording. ESP Guitars just got behind the band with an endorsement deal, those who join will be placed with ESP as well.

The plan over the next 2 - 3 months is to have a solid 3 radio ready singles with music videos for each, promo photos to be ready for 1st quarter or even earlier this winter. The project has a few companies behind it already with Marketing & shopping set to start when project is ready.

The sound can be compared to a modern touch to the classic era of Guns & Roses, Motley Crue, Def Leppard, Aerosmith, AC/DC, very big sound with big group vocal chants, something that can totally hit mainstream radio but still be bad ass. Bands image is very larger than life.

Looking for people who can contribute to the writing!!!
