1 and 1/2 yr old Chesapeake Bay Retriever 78.4lbs Small rehoming fee. Reached his full height from what the Vet has said. I have all of his records from when he was 12weeks and has seen the same Vet the whole time since I have owned him. No Health problems and Perfectly Healthy and playful and a lick. He is a Lover thats for sure. Jumps for joy uncontrollably everytime I come home. I just do not have the time he needs. Love him to death but I really cant make it workout. Naturally he took his water and retrieving abilities in full force he loves the water and his toys. He has never chewed a shoe or funiture since I have had him. Responds the best to treats and this whistle I do. Walks well on a leesh and harness, still a little hard headed walking off the leesh. He has also been Neutered and had AKC
