The nice thing about radio advertising is that you can get your message out over the airwaves, for all to hear; however, if you go to a few radio stations and have them each produce your commercial you'll have that same message sounding different from station to station (since radio stations cover many formats). Having your message voiced and produced by the radio commercial production crew at Shipley Audio Productions and taking it to those same stations creates familiarity, because it's the same commercial on each station you use, regardless of format. ? With years of experience in radio commercial production and voice over service behind the mic, you can feel confident that your message will be delivered to your specifications and on time. Your commercial could be a simple voice message without music or sound effects; or, your message could have all the bells and whistles (music, sound effects, vocal effects...etc). Shipley Audio Productions offers copywriting, voiceover and full audio production capability. ? We offer high quality radio production services at competitive prices. Rates start as low as \$49.95! Visit our website and contact us TODAY! www.shipleyvoiceover
