This is sooo easy.

Our first session, I will take you into the primer material from my 58 page pdf, *Mysterium Musicorum*. Additional sessions (if necessary) are \$25 per hour.

I say "if necessary" because the book contains everything you will need to know to proceed from guitarist to musician and on to virtuoso on your own-like I did. No mimicking weak examples, we will start from a single note- a seed, and find out just exactly what can be done to cause this growth.

The difference is Knowledge- You can play, but do you Know? Only those who seek will find-

If there are any gaps in your understanding, allow your desire to become- to overcome, and send me a note or visit me at www.webbguitar.com

Buy the book and give it a go on your own! (feel free to have a session later to expand on any topics)

My pdf covers total fretboard mapping, octaves, fingerings, complete Major scale theory with modes(moods), triads for arps and chords, harmonizing the Major scale for progressions, pentatonic scale, and many occulted concepts and principals to be discovered. If you aren't sure of any of these ideas you will forever remain at the gate. I have them demonstrated here, in simplicity.

Order the pdf online for ANY amount you wish to pay.

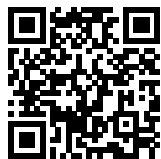

All are welcome to the Mystery, few will examine- but the one's who do, can never forget.

Thank you Twin Cities, I am proud to serve this wonderful group of talent for the years that I.
