

Saris Bones 3 Bike Trunk Rack (80 USD)

Location **Indiana**
<https://www.genclassifieds.com/x-567689-z>

Very well-built trunk rack with injection-molded arms and legs, making them very sturdy and light. Made of non-rusting material. The ratcheting anti-sway straps secure and stabilize the bikes. The arc-based design fits over most spoilers, and separates bikes on different levels.

Have had this rack for a year, used it a few times to transport bikes to state parks and outside of town. We used it mostly for a mountain and a hybrid bike, each weighing about 30 lbs. This rack is so sturdy it could take heavier weight than that, though, certainly. Have since bought a different car and now use a hitch rack.

Please email me if interested. Thanks!

MSRP \$169
