Finding the right child care for your family is not easy. You want to find a safe and nurturing environment for your children but there are so many options that it's difficult to find the perfect place. At <http://www.CareLuLu.com>, we do the homework for you! We ask child care providers all the important questions parents want to know and allow you to do a personalized search to easily find a daycare or preschool that offers the services you're looking for. Best of all, it's completely free!

Are you looking for a language immersion program, or part-time care? Or do you require a peanut-free environment because your child is allergic? No need to call dozens of centers asking the same questions over and over again, simply select the appropriate filters and you will see those child care programs that fit your needs.

We only list licensed providers, so you don't have to worry about whether the safety or caregiver's training meet the standards. Licensed providers undergo regular unannounced government inspections and for family child care, caregivers AND adult members of the household undergo background checks.

With CareLuLu, you avoid the hassle of searching through dozens of websites or spending hours on the phone. Instead, you can find all the information in one place, including tuition, photos and verified reviews by other parents. It's also very easy to compare the schools you like, contact them and book a tour. Programs available include preschool, child care center, family child care (home daycare), part-time daycare, as well as before and after school care for all ages (Infant, Toddler, Pre-K, Kindergarten.)
