Does anybody knows of a good provider for internet service?

We had cable one for 2 years, and on the first year it was \$80+ for internet and cable, then they increased the price to \$110 because their "promotional rate" was just for a year, now they just increased that again to \$135...screw that!

Greedy scumbags!

Does anybody knows of an internet service provider? we had clear wire before and it was the worst thing we ever.
