

Profesional IOS app developer needed (Boise)

Location **Idaho** https://www.genclassifieds.com/x-568146-z

I am in search of a professional IOS mobile app developer to begin work on an app I have been planning for over a year. This is a very detailed app that will require a high skill level. The first project will be a simple 3-5 page display for presentation and demonstration purposes. It will need to function but not in complete detail as the finished app will.

I will be sitting down with all potential developers and will be going over the details in person.

A NDA will be required before any information is given or any work is promised or payed for.

Pay will be determined by the skill level, work speed and what will be done.

Please don't waist my time if you aren't skilled enough to produce a good finished product in a timely manner. I have no desire to wait on someone just to find out they think putting pictures on a page is skillful.

Please reply to the contact information above with a link to your professional website or portfolio. Or contact me via text as I am in meetings throughout the day and rarely pick up unknown numbers.

Thanks-
