

# VW Beetle AC Compressor (25 USD)

Location **North Dakota**  
<https://www.genclassifieds.com/x-568547-z>

Lost AC in 2000 VW New Beetle 1.8 Turbo. Mechanic diagnosed bad clutch on AC Compressor. I chose to replace entire compressor rather than replace just the clutch. Apparently easy and cheap to do yourself, but I just wanted to get a new one instead. Junkyard wants \$130 for these (presumably with working clutch). Email is best to contact me, but need to include a phone number for me to take you seriously.

Checked clutch magnet with Ohm meter and the clutch is dead.

This compressor will work in many VWs like Golf and Jetta, but you will need to do your homework to make sure it will work for
