I have a 1993 Honda Civic, 4 door sedan. The car is my daily driver. Never has had any problems. Needs a little body work. Motor only has about 51k. Car has about 189k on body. The motor is a sohc with exhaust headers after market throttle body with a blue aem fuel rail, also has cold air intake and other little mods. Car has 12" system. Email for more details or to come see it. Stage 2 clutch just installed.
